

Test 8—Question 2: Problem Solving

- 2** A music store is reducing the original price (y) of its jazz CDs by \$1.50 each. The formula to find the sale price (x) is given below.

$$x = y - \$1.50$$

Jennifer wants to buy three CDs that originally cost \$17.99, \$13.99, and \$9.99.

How much will Jennifer spend on all three CDs after the reduction?

Show All Work

Answer \$ _____
